

JOSUE SALCEDO VILLANUEVA

DATA ENGINEER / ANALYTICS ENGINEER

Barranquilla, Colombia · +57 301 475 7723 · salcedojosue095@gmail.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

Systems Engineer and Data Engineer focused on building scalable, reliable data pipelines and analytics data products. I have hands-on experience with Python, SQL, Snowflake, dbt, and AWS, designing ETL/ELT workflows across multiple data sources and improving data quality, consistency, and pipeline reliability. Currently supporting a US-based data product, I am a proactive, highly responsible professional with strong problem-solving skills, a growth-oriented mindset, and a track record of delivering data-driven solutions in dynamic, cross-functional environments.

TECHNICAL SKILLS

Languages & Querying: SQL (querying, transformation, validation, optimization), Python, Bash scripting

Data Warehouse & Modeling: Snowflake (tables, structures, data models), dbt (modular transformations, tests, documentation)

Pipelines & Processing: ETL/ELT across multiple sources, Apache Kafka, Apache Spark

Orchestration & CI/CD: Prefect, Apache Airflow (production scheduling, monitoring), Jenkins, Docker

Cloud & Platforms: AWS (S3, scalable storage & processing), Microsoft Azure

Analytics, BI & Other tools: Power BI, Microsoft Excel, Git, GitHub, Bitbucket

PROFESSIONAL EXPERIENCE

Loopstudio — Data Analyst / Data Engineer

Apr 2025 – Present

I work for a client with a product fully focused on data, as part of the Ingest team, where we ensure that the information used is accurate, reliable, and valuable for the company. On a daily basis I build, deploy, and maintain production data infrastructure, guaranteeing the quality and consistency of ingested data, which directly impacts client satisfaction, retention, and company revenue.

- Build and maintain scalable Python data pipelines on Snowflake and AWS as part of my daily work, reducing new client onboarding time by 40% and accelerating time-to-value.
- Orchestrate production data workflows with Prefect and Airflow, managing scheduling, dependencies, retries, and monitoring to ensure pipeline reliability and observability.
- Own the deployment lifecycle through CI/CD using Jenkins, Bitbucket, and Git, with version control and automated pipelines as a standard part of my daily workflow.
- Develop dbt models (modular transformations, tests, and documentation) and design ETL/ELT workflows integrating multiple data sources with AWS S3 for scalable storage.
- Write and optimize SQL daily to query, transform, and validate data, enabling immediate data mapping and reduced report delivery times for analytics and decision-making.

Allied Global / Quantica BPO — Data Analyst

Apr 2024 – May 2025

Applied data analytics in the Business Assurance and Fraud Management department for a major US telecommunications client (Verizon), working under the Scrum agile methodology.

- Used Python, SQL, Power BI, and Excel to identify patterns that impacted business processes and improved ETL workflows.
- Replaced manual reporting processes with automated solutions, reducing manual effort and improving consistency.
- Visualized key indicators that supported critical decision-making.
- Contributed to monitoring systems within Verizon's proprietary tool to ensure processes ran normally and to trigger alerts on unusual events.

Freelance Data Engineer (Independent) — Data Engineer

Aug 2023 – Feb 2024

Delivered data engineering projects for small businesses across different industries, building pipelines, integrations, and dashboards tailored to each client's decision-making needs.

- Built and scheduled Python web scraping pipelines (orchestrated with Airflow) for a coworking company to benchmark event-venue pricing against competing providers.
- Designed SQL-based dashboards for a school that needed all its data accessible in one place to support decision-making.
- Built and maintained ETL pipelines in Python integrating 4 data sources to process transaction and customer-preference data for an e-commerce business, using Git for version control across all projects.

EDUCATION & CERTIFICATIONS

B.Sc. in Systems Engineering — Universidad de la Costa (CUC), Barranquilla

May 2026

Python for Data Science, AI & Development — IBM

Databases and SQL for Data Science with Python — IBM

LANGUAGES

Spanish — C2 (native) | English — C1 (advanced)
